

# Confined Spaces 密閉空間

Guidance Note 指引

## Planning the Job

- Do the work outside of the confined space if possible
- You must have a 'confined space worker' card to work in a confined space
- Do not enter the confined space if you do not have a valid entry permit
- Prepare gas testing equipment, ventilation and lighting
- Emergency arrangements must be planned before you start work

## Personnel

- A trained confined space attendant must remain outside of the confined space AT ALL TIMES
- Only people who have been specially trained and are medically fit can be involved in confined space entry and rescue
- Authorized Gas Testers will carry out atmospheric tests using special detection equipment
- Confined entrants shall be provided with individual gas monitor

## Safety Documents

拯救計劃

### PPE

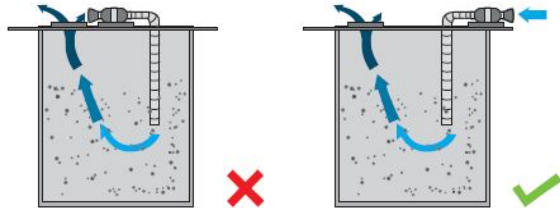

**IF YOU DON'T FEEL COMFORTABLE TO ENTER  
A CONFINED SPACE DO NOT ENTER**

# Confined Space Requirements

## Safety System and Equipment

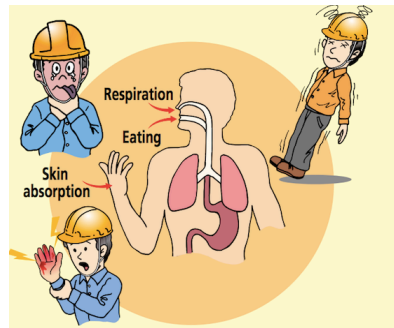

Force Ventilation

Gases Monitoring System

## Hazards

### BE AWARE OF SNAKES

use and check the gas monitor at all times

- extremely high or low temperature
- dampness
- wet spaces

electric cables, electric wires and transformers or using electrical appliances in wet spaces

- passing vehicles.
- people falling into the confined spaces

Noise when working in confined spaces is generally higher, leading to impairment in workers' hearing or even deafness

- X NEVER ENTER A CONFINED SPACE ALONE
- X NEVER PUT PURE OXYGEN INTO THE AIR. THIS INCREASES THE RISK OF FIRE OR EXPLOSION
- X NEVER USE FUELED ENGINES IN CONFINED SPACE OR CLOSE TO CONFINED SPACE
